Education

2019–2025

Double BSc in Physics and Materials Engineering, *University of Seville*, Seville, Spain

- **Physics Core:** Developed advanced complex problem-solving abilities and comprehensive laboratory research experience.
- **Materials Core:** Acquired specialized technical expertise in plastics/polymers, metal corrosion, and semiconductors.

BSc Thesis: *Análisis Estocástico del Arbitraje Financiero* (Quantitative Finance)

1 Year

Computer Science Studies, *East China University of Science and Technology (ECUST)*, Shanghai, China

- Focused on coursework in Artificial Intelligence and Pattern Recognition algorithms.

1 Year

Erasmus+ Exchange Program, *Gdańsk University of Technology*, Gdańsk, Poland

- Conducted studies at the Nanomaterials Center as part of the Master's program in Nanoscience.
- Utilized the Polish *Kraken* supercomputer for advanced computational tasks and simulations.

Experience

2025

Project Buyer Intern, *Valeo*, Martos, Spain, 1 year

- Managed the procurement of plastic components and injection molds for new headlight projects for Skoda and Volkswagen.
- Collaborated with the AI team to develop and implement an artificial intelligence project aimed at automating bureaucratic and administrative processes.

2024

Materials Engineering Intern, *Smart Materials 3D*, Alcalá la Real, Spain, 6 months

- Conducted mechanical and thermal characterization to test and validate polymeric materials for FFF/FDM 3D printing in compliance with ISO standards.
- Assisted in the industrial extrusion production line of 3D printing filaments (including PLA, PETG, and technical materials).
- Monitored key extrusion parameters and performed quality control checks, ensuring precise filament diameter tolerances and optimal spooling.

2021–2022

Intern, *UBS Europe SE*, Luxembourg

2015–2018

Football Referee, *Royal Spanish Football Federation (RFEF)*, Spain

Skills & Competencies

Programming

Python, Matlab

Other Skills

Laboratory Research Experience, Data Analysis, Quantitative Finance
